

contracting cooperative (or cooperatives) and the contract vessel's home cooperative. In the event that multiple cooperatives are jointly contracting with a non-member vessel, the harvest schedule must clearly specify how all catch and any overages will be allocated among the various cooperatives.

(3) *What vessels are eligible to conduct contract fishing on behalf of an inshore cooperative?* Only AFA catcher vessels with an inshore fishing endorsement that are members of an inshore cooperative may conduct contract fishing on behalf of another inshore cooperative.

(4) *Who must be informed?* A cooperative that has contracted with a non-member vessel to harvest a portion of its inshore pollock allocation must inform any AFA inshore processors to whom the vessel will deliver pollock while under contract to the cooperative prior to the start of fishing under the contract.

(5) *How must contract fishing be reported to NMFS?* An AFA inshore processor that receives pollock harvested by a vessel under contract to a cooperative must report the delivery to NMFS on the electronic delivery report by using the co-op code for the contracting cooperative rather than the co-op code of the vessel's home cooperative.

[67 FR 79734, Dec. 30, 2002, as amended at 68 FR 6836, Feb. 11, 2003; 69 FR 64688, Nov. 8, 2004; 70 FR 9868, Mar. 1, 2005]

§ 679.63 Catch weighing requirements for vessels and processors.

(a) *What are the requirements for listed AFA catcher/processors and AFA motherships?* (1) *Catch weighing.* All groundfish landed by listed AFA catcher/processors or received by AFA motherships must be weighed on a NMFS-certified scale and made available for sampling by a NMFS certified observer. The owner and operator of a listed AFA catcher/processor or an AFA mothership must ensure that the vessel is in compliance with the scale requirements described at § 679.28(b), that each groundfish haul is weighed separately, and that no sorting of catch takes place prior to weighing.

(2) *Observer sampling station.* The owner and operator of a listed AFA catcher/processor or AFA mothership

must provide an observer sampling station as described at § 679.28(d) and must ensure that the vessel operator complies with the observer sampling station requirements described at § 679.28(d) at all times that the vessel harvests groundfish or receives deliveries of groundfish harvested in the BSAI or GOA.

(b) *What are the requirements for unlisted AFA catcher/processors?* The owner or operator of an unlisted AFA catcher/processor must comply with the catch weighing and observer sampling station requirements set out in paragraph (a) of this section at all times the vessel is engaged in directed fishing for pollock in the BSAI.

(c) *What are the requirements for AFA inshore processors?* (1) *Catch weighing.* All groundfish landed by AFA catcher vessels engaged in directed fishing for pollock in the BSAI must be sorted and weighed on a scale approved by the State of Alaska as described in § 679.28(c), and be made available for sampling by a NMFS certified observer. The observer must be allowed to test any scale used to weigh groundfish in order to determine its accuracy.

(2) The plant manager or plant liaison must notify the observer of the offloading schedule for each delivery of BSAI pollock by an AFA catcher vessel at least 1 hour prior to offloading. An observer must monitor each delivery of BSAI pollock from an AFA catcher vessel and be on site the entire time the delivery is being weighed or sorted.

§ 679.64 Harvesting sideboards limits in other fisheries.

(a) *Harvesting sideboards for listed AFA catcher/processors.* The Regional Administrator will restrict the ability of listed AFA catcher/processors to engage in directed fishing for non-pollock groundfish species to protect participants in other groundfish fisheries from adverse effects resulting from the AFA and from fishery cooperatives in the BS subarea directed pollock fishery.

(1) *How will groundfish sideboard limits for AFA listed catcher/processors be calculated?* (i) Except for Aleutian Islands pollock, the Regional Administrator will establish annual AFA catcher/processor harvest limits for each
